

## AfriNIC Fees schedule 2007-2008

### 1. Introduction

To support its operations, AfriNIC charges its members fees that may change from year to year according to operational costs and financial health of the organisation and upon validation by the Board of Directors. Below is the detailed fee schedule for 2007-2008.

To become a full member and get services (assignment/allocation) from AfriNIC, new applicants will have to pay the initial service and membership fees. AfriNIC will charge an annual fee for service and membership according to the figures below. **A special 10% discount will be offered to organisations that make renewal payments prior to the invoice date or within the 20 days of date of invoice.**

Each non-LIR ASN assignee will have to pay USD 400 initial setup fees in addition to a yearly maintenance/membership fee of USD 50. Payment of the initial assignment fee will be made plus the first 3 years (USD50x3) maintenance/membership fee (i.e. total payment of USD 550). Subsequent membership/maintenance fee will be collected in advance every 6 (six) years.

End Users which will request IP address assignments from AfriNIC will pay an Assignment fee of USD 2,500 for the minimum allocation size and an annual flat USD 100 for maintenance/membership fee. Subsequent membership/maintenance fees will be collected in advance every 3 (three) years.

### 2. Special category

#### a. Individual Membership (Honor Members):

The AfriNIC Board will grant special Membership status to Individual persons willing to contribute to the organisation as formal members. These Honor Members will have to pay an annual membership fee of USD 100 which will be invoiced in advance every three years (USD 300). This membership category is exclusive for Individuals and can not be applied to corporate organisations.

#### b. Academic and Research Institutions<sup>1</sup>

AfriNIC will apply a 50% discount to organisations which justify that they are official Academic or Research Institutions in their countries and demonstrate the exclusive use of assigned/allocated resources for not-for profit academic or research activities. In most cases, such members fall under the End-site category. Academic and Education sites which will request to be LIRs must be requested to provide further documentation in regard to their network infrastructure and to the need for assignments to other organisations other than their own. AfriNIC may seek the AAU (African Association of University) advice on this category of member

---

<sup>1</sup> The discount for this category of member will be reviewed by the Board every year

### 3. IPv4 Fees and categories

IPv4 fees are set based on the minimum allocation size which is a /22. LIR Members categories will be organised in 5 categories according to the size of their allocation. The maximum allocation size at AfriNIC is /10. The table below gives the categories and the associated fees:

Category	Network Size	Initial Setup fee	Membership (Annual)	Early payment Fee <sup>2</sup>
Very small	/22 to /21	USD 1,750	USD 1,750	USD 1,575
Small	> /21 to /19	USD 2,000	USD 2,250	USD 2,025
Medium	/18 to /16	USD 3,000	USD 6,500	USD 5,850
Large	> /16 to /14	USD 5,000	USD 13,000	USD 11,700
Extra large	> /14	USD 6,000	USD 20,000	USD 18,000

### 4. IPv6 fee and Categories

IPv6 is in its very early adoption stage in our region. To encourage and promote its usage in the Region, the AfriNIC board has ratified the following measures<sup>3</sup>:

- a. For already established LIRs (with IPv4 allocation(s)):
  - Not to count the IPv6 prefix allocation in calculating the category of already established LIRs.
- b. For New LIRs:
  - i. Allow 50% discount on the initial setup fee and 100% discount on the first year's membership fee for a LIR with IPv6 only allocation.
  - ii. Allow respectively 75%, 50%, 25% discount on the membership fee for the three the subsequent years.

Category	Allocation Size	Initial Setup fee	Membership (Annual)
Small	/32	USD 2,500	USD 2,500
Large	> /32	USD 20,000	USD 20,000

<sup>2</sup> These fees are applicable only to payment made in advance or less than 30 days after the renewal invoice is generated.

<sup>3</sup> These measures will be reviewed by the board each year.

## 5. IPv4 and ASN assignments to “End-Sites”

AfrinIC assigns IPv4 addresses to End-site organisations who meet the criteria established in its End-User assignment policy (afpol-euv4...). End-site organisations have to become AfrinIC members to get resource assignments and pay for each assignment according to the size of IP block requested. The different End-Site categories are below:

Category	Assignment Size	Assignment fee	Membership (annual)
Small	/24 to /20	USD 2,500	USD 100
Medium	> /20 to /19	USD 5,000	USD 100
Large	/18 to /16	USD 7,500	USD 100
Extra Large	> /16 to /14	USD 10,000	USD 200

Initial ASN fee	Membership (Annual)
USD 400	USD 50

Organisations holding both ASN and IPv4 space will not be charged with the ASN maintenance fee but will pay a unique fee associated with their IPv4 End-User membership (USD 100 /Year).

## 6. Resource Transfer

At this point, AfrinIC will not charge any fees for IP address and ASN transfers. The category of the new organisation that is taking over the allocated resource will be recalculated after the transfer and a new fee may apply at its next year’s renewal. The new organisation may be asked to pay if they require a change of the Organisation Handle linked to the joint resources. The fee applied is equal to the Initial setup fee for the category of the previous organisation. - *Before requesting transfer of IPs and/or ASN, please check AfrinIC allocation policies about the transfer policy.*
